Using Nature's Nectar™, Organa™ Guano & Organa ADD certified organic plant nutrients for optimal results

Using the Nature's Nectar™ & Organa™ organic nutrient program is very simple and effective. Greenhouse & field tests prove that the same product dosage can be used for the entire growth cycle of the plant. It will not burn your seedlings, yet it can grow 20 ft. plants loaded with fruit.

NATURE'S NECTAR/ORGANA GARDENING TIPS FOR HYDROPONICS

- Please do not adjust pH. Greenhouse trials have proven that this step is not necessary.
- Clean all equipment between grow cycles.
- To keep reservoir looking like mineral based nutrients please add a 100 micron filter (this is not mandatory for performance).
- Change reservoir weekly.
- Nature's Nectar and Organa natural organics will not register on a PPM/EC pen (no pen required).
- DO NOT inject air into reservoir (i.e. air stones, air pumps, etc.), or use in aeroponics or with hydroton!

MIXING INSTRUCTIONS: SOIL

Same as above with no special procedures for soil growing.
